

Features

- ✓ Gain 8 dBi
- ✓ antenna cable required

WiFi Antennas Panel, 8 dBi

In order to optimize the reception performance of the WiFi devices, we offer a selection of different antennas. Matching connection cables can be obtained depending on the antenna design.

Ideal for use in directional transmission and reception indoors and outdoors.
The range and WLAN performance is significantly improved by this design. The corresponding fixtures for wall mounting are included.

General information

Order number	700-889-ANT03
Article name	Panel antenna, 8 dBi (antenna cable required)
Scope of delivery	Panel antenna
Dimensions (DxWxH)	30 x 107 x 94 mm
Weight	320 g
Protection rating	IP 67
Frequency range	2400 – 2483 MHz
Polarization	vertikal
Gain	8 dBi
Impedance	50 ?

Connector type

N-Type (f)
