

Features

- ✓ Expands the account to **250 user groups**
- ✓ Expands the account to **250 clients**
- ✓ Additional firewall settings behind the REX router

myREX24 V2 Public Server Erw. Benutzerzugriffskontrolle

The myREX24 V2 portal is an integrated system for accessing the components of your machine or system, for remote maintenance and remote diagnosis. Control the data of your system via web browser - directly with your smartphone or tablet. All data and states that are available to you as an external signal or as a value in a control system can be evaluated and monitored with the myREX24 V2 portal. Log operating data directly in the myREX24 V2 portal and create your own reports.

The license is non-transferable!

More flexibility for user management!

This extension allows you to add **additional user groups and clients**.

As an additional feature, an extended firewall function is activated behind the routers. This allows **VPN access to be limited to a single component/IP address** (e.g. a specific frequency converter, PLC or HMI).
