

Features

- ✓ **additional active VPN connection**
(Floating license - expandable up to 250 simultaneous active VPN connections)

myREX24 V2 Public Server 1 aktive Verbindung

The myREX24 V2 portal is an integrated system for accessing the components of your machine or system, for remote maintenance and remote diagnosis. Control the data of your system via web browser - directly with your smartphone or tablet. All data and states that are available to you as an external signal or as a value in a control system can be evaluated and monitored with the myREX24 V2 portal. Log operating data directly in the myREX24 V2 portal and create your own reports.

The license is non-transferable!

[> Set up myREX24 portal access.](#)

This license enables the **parallel execution of remote maintenance by an additional user.**

Although the free account already enables an active connection (User <=> Router), this license opens up the opportunity to react more flexibly to increased requirements.

For example, if two PLC technicians need to carry out remote maintenance simultaneously, this license expands your capacity accordingly. This also makes it possible, for two PLC technicians to access a machine or a router at the same time.
