myREX24 V2 Public Server 50 Web2Go-Verbindungen

The myREX24 V2 portal is an integrated system for accessing the components of your machine or system, for remote maintenance and remote diagnosis. Control the data of your system via web browser - directly with your smartphone or tablet. All data and states that are available to you as an external signal or as a value in a control system can be evaluated and monitored with the myREX24 V2 portal. Log operating data directly in the myREX24 V2 portal and create your own reports.

The license is non-transferable!

With Web2Go you have quick and convenient access to services that run within a machine network.

For example, you can use a **tablet** or **smartphone** to control **VNC-capable control panels (HMI)**, use **web servers** for components such as managed switches and PLC controls, or control **industrial PCs via RDP**. All you need is a browser.

With this package you can use an additional 50 simultaneous Web2Go connections.
