

Features

- ✓ Connection to an external database
- ✓ Values collected in the myREX portal are written to an external database
- ✓ Enables further processing of the data by other applications

myREX24 V2 Public Server Externer Datenpunktspeicher

The myREX24 V2 portal is an integrated system for accessing the components of your machine or system, for remote maintenance and remote diagnosis. Control the data of your system via web browser - directly with your smartphone or tablet. All data and states that are available to you as an external signal or as a value in a control system can be evaluated and monitored with the myREX24 V2 portal. Log operating data directly in the myREX24 V2 portal and create your own reports.

The license is non-transferable!

[> Set up myREX24 portal access.](#)

The data points collected in the myREX portal can be transferred to an external database. This means you can reuse values from PLC controls and logging in other applications.

The external database must be publicly accessible and have the following permissions:

- SELECT
- ALTER
- CREATE
- DELETE
- DROP
- INSERT
- UPDATE
- FILES
